Hi Everyone - I hope you are all doing well. I am afraid it's that time of year again where we have to review SCOR WG. I understand everyone is busy and some may not wish to stay on the committee - please advise! I have already started reviewing all the proposals and to make it easy and less time consuming I will send you my reviews tomorrow. Please then see whether you agree with them - or would prefer to recommend (and reasons) another WG.

<https://scor-int.org/events/scor-2022-annual-meeting/>

So far, the line-up of SA researchers included in the proposal is mixed - SA researchers tend to be in the Associate Membership band which in some cases is not appropriate at all given our local expertise, one proposal aims to work off Namibia yet is completely skewed to the Northern hemisphere scientists! - but one or two have SA researchers in their Full membership with ToxMAP being co-chaired by Tess Gridley .. I am always a supporter of proposals that are fully inclusive!

Deadline is 31st August, and I will send you my scorecards tomorrow at the latest.

Best wishes
Isabelle

Hi Everyone - For anyone wishing to review please find attached the score card. Please note that three WP proposals have SA researchers - Marcello Vichi Clce2Clouds, Anthony Bernard Concensus (PI) and Paula Patrick (OLO).

Deadline is this Friday if you wish to review.

Subject: Re: SA National Committee for SCOR 2021

Hi Everyone - I am afraid its that time of year again to review SCOR proposals. I understand everyone is very busy and the last thing you want right now is another online task! so if you prefer I am happy to rank the 5 proposals and then send out for everyones approval the ranking. Let me know if this is ok with you or if you would prefer to review the proposals individually (?)

Hope you are all doing well!

FYR: Proposal can be found under Tab 2

Subject: Re: SA National Committee for SCOR 2020

Dear All,

Thank you all for your input. I would like to get the results to the SCOR committee by the end of this week if the National committee are happy for me to do so on the current results. There was a great deal of interest and support for all 10 but AROMIX and INTERSEEP were the two highest ranking proposals. The reasons are provided in the attached spreadsheet where I have collated everyones comments. Please feel free to contact me if you believe that I have overlooked anything significant in finalising this result.

Best wishes
Isabelle

Subject: SA National Committee for SCOR 2020

Dear All,

Thank you for volunteering or continuing to be on the SA SCOR panel! I really appreciate the time you are prepared to give to this very important selection process. I have emailed a few others and just waiting to hear from them but in the meantime I think it would be good to get started and identify the top two working groups (WG). The process is relatively easy in that we have a total of 10 working groups and we need to identify "must fund" against "may fund" and "not fund".

The WG can be found under proposals on <https://scor-int.org/events/2020-scor-annual-meeting/>

A change to past procedures is that this year I would rather not dictate which proposals you have to review - rather ask each of you to review 3 of the proposals that interest you the most. We are a large and diverse group and I know all the proposals will be reviewed by at least two! I will then collate the results and then email out the top 3 for a final decision on the best 2.

There is a straight forward spreadsheet with columns with the standardised SCOR criteria. I have set up the cells as a rubric format just click on the drop down menu in each cell. More importantly is that you identify the funding option (rating) and of your 3 its ranking - these cells are in yellow.

Finally - I understand everyone is busy but could I please have your responses by the 21st August?

Any queries or not sure how to - please send me an email and I can walk you through the process.

Best wishes, thank you and happy reviewing!!
Isabelle
