Bibliography ..... 3

Navigate to **NASA's EARTHDATA** and follow the **Find Data** link:

Figure 1: Figure 1: Navigate to the Find Data link.

If you have not already registered, select **Register**.

Scroll down a bit on the page you landed on when you selected Find Data, and select the **Earthdata Search** link:

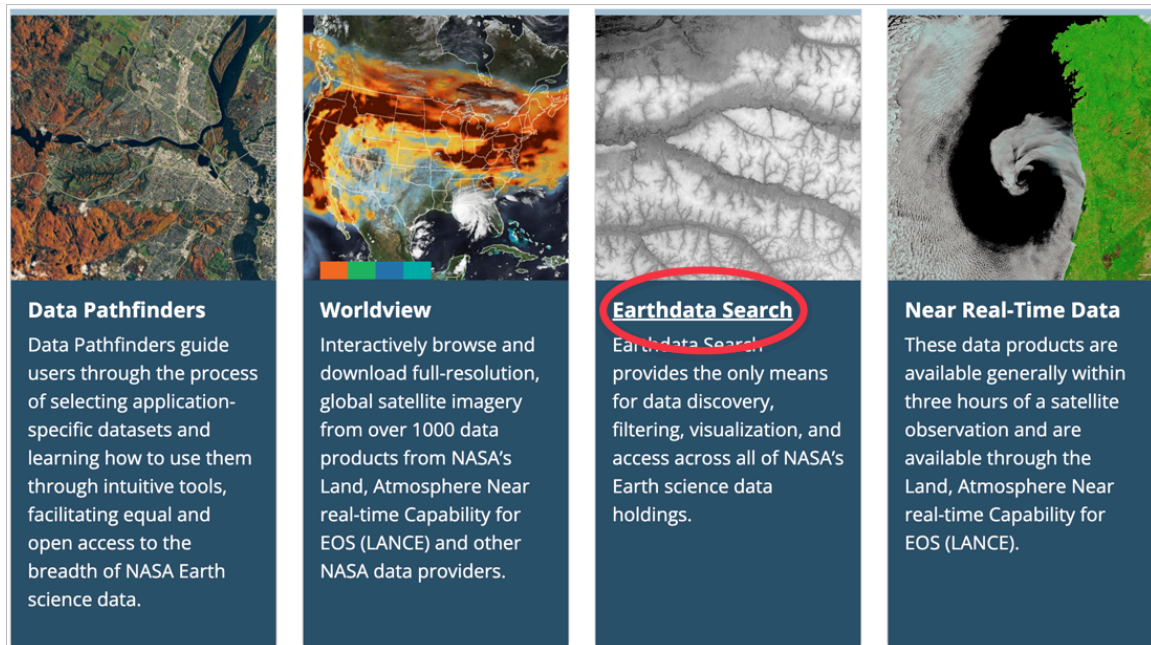

Figure 2: Figure 2: Go to the Earthdata Search page.

On the search page, enter a keyword for the data product you are interested in downloading (① — I searched for ‘chlorophyll’), select the processing levels of interest (②), and scroll down to the data product you want (③ – here I select “**Aqua MODIS Global Mapped Chlorophyll (CHL) Data, version R2022.0**”):

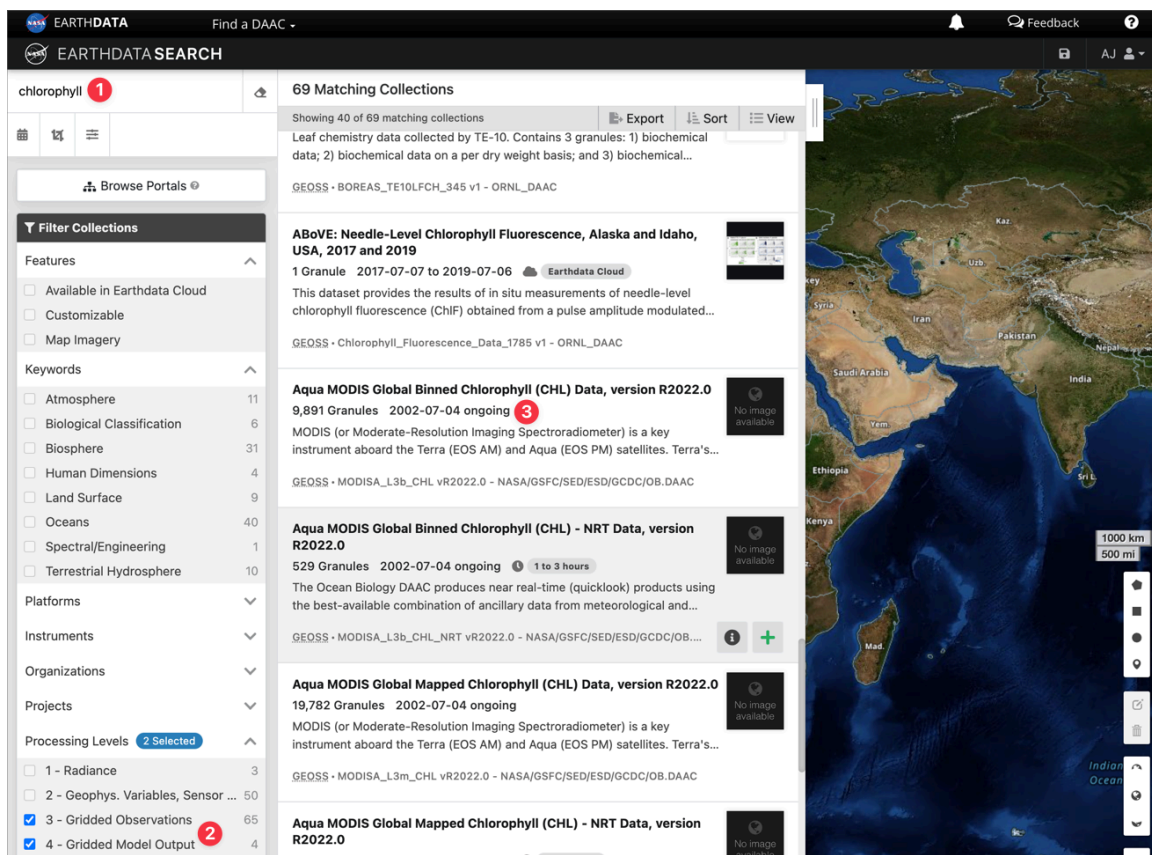

Figure 3: Figure 3: Select the data product of interest by entering keywords and selecting from amongst various filter options.

Selecting Option ③ in Figure 3 takes you to Figure 4. Here you will notice one file for each day in the observational period; as you can see, there are 19,782 ‘granules’ (as per 15 June 2023). There is an option to download each day using the
